

MACHINE PROCESS AUTOMATION ENGINEER- Recruiter Posting 3-11-2011

MACHINE PROCESS AUTOMATION ENGINEER

E-Technologies Group has been providing high-value engineering and information technology service for all project phases since its founding in 1993. Our focus is on creating value added, quality solutions for our clients, helping them to meet both their current and long term business objectives. As a company, we pride ourselves on our commitment to our clients and employees. We're headquartered in West Chester, Ohio just North of Cincinnati and have offices in Phoenix, Arizona and Bangkok, Thailand.

E Technologies Group is a privately owned business with about 100 employees and experiencing phenomenal growth and expansion. To meet the immediate needs of our Fortune 50 and 100 clients, we are in need of 25 qualified engineering professionals for roles in food and beverage, consumer goods and pharmaceutical industries. If you want to be a part of a progressive organization with a unique growth opportunity, send us your resume.

E-Technologies Group has 3 -7 immediate direct hire positions for experienced Mid to Senior Level Controls Engineers with an emphasis in Machine Process Automation.

The Machine Process requirements include the following:

- Knowledge and expertise in high speed counting, machine vision, packML, and servo motion backgrounds.
- Ability to recommend new control system equipment or retrofit existing.
- Develop control and strategy for line integration.

Evaluate new control system capabilities and service history; evaluating vendor service and support. The Ideal candidates must have experience working in the consumer goods, family care, food and beverage, and/or pharmaceutical industries.

Experience in working with batch processes and an in-depth knowledge of at least one of the following technologies is required: Rockwell, Wonderware, ArcestrA, Siemens and/or Delta V.

Preferred Skill Sets or Education:

- BA/BS degree in engineering, computer science or related field or equivalent education and experience.
- Minimum of 5 years of professional experience
- Experience with Rockwell software products required (e.g. RS Logix 5000, RS View SE or FT View SE, RSHistorian, RSBatch or FTBatch, RSSQL, etc.)
- Wonderware ArcestrA/System Platform experience
- Siemens
Siemens PC S7
PLC Programming experience - Any platform
- HMI programming experience
- Any DCS experience
- Any TDC 3000 experience
- Good written and verbal communication skills.
- Familiar with Microsoft Office 2003-2007
Ability to troubleshoot and resolve solutions to multi-platform software architectures.
- Strong analytical, communication and problem solving skills as this role will require the individual to support new development projects, gather customer requirements, perform analytical programming and provide excellent documentation
- Superior communication and team building skills are required, as extensive internal/external client interaction is an everyday part of the position
